**Re: Nuclear Energy Institute/Utilities Telecom Council Request for Waiver
ET Docket No. 05-345 – CORRECTION**

Dear Ms. Dortch:

This letter serves to correct one statement in the recently filed Amended Report filed in the above-referenced docket.¹ The correction is based on revised information received by the Utilities Telecom Council (UTC) from its utility member, Energy Northwest.

On page 4 of the Amended Report, NEI/UTC states that: "UTC has been notified of only one Plant, owned by Energy Northwest, that has adopted alternative equipment operating in the 900 MHz band." The statement was based on information provided to UTC by Energy Northwest; however, that utility has since informed UTC that the equipment in use is the HME wireless two-way headset described elsewhere in the Amended Report. The HME headset operates in the 2.4 GHz unlicensed band, not 900 MHz.

All other statements in the Amended Report remain true and accurate to the best of NEI/UTC's knowledge. If there are any questions concerning this matter, please contact the undersigned directly.

Respectfully submitted,

/s/_____

Ellen c. Ginsburg
Vice President, General Counsel
Nuclear Energy Institute

/s/_____

Jill M. Lyon
Vice President & General Counsel
Utilities Telecom Council

Cc: Bruce A. Romano, Esq.
